DATE	Octobre 4th 2026
RE	Request for support of a two-day, in-person consensus meeting for Defining Disease Flare in Non-Systemic Juvenile Idiopathic Arthritis: A Consensus-Driven and Data-Informed Approach by the Flare Task Force
REQUEST	Sponsorship support at the Gold Tier (€50,000)

Dear Dr. Ringold and the Johnson & Johnson Innovative Medicine Sponsorship Review Team,

PI home institution: Department of Pediatrics, University Hospital of North Norway, Tromsø, Norway. Legal representative: Elin Gullhav, Director of Division of Child and Adolescent Health, University Hospital of North Norway, Tromsø, Norway.

On behalf of the Flare Interest Group, we respectfully request sponsorship support for the In-Person Consensus Meeting for the project, Defining Disease Flare in Non-Systemic Juvenile Idiopathic Arthritis: A Consensus-Driven and Data-Informed Approach, led by the Flare Task Force. The meeting will be held over two days in spring 2027 (tentatively between March and May 2027) in Oslo, Norway. The meeting will bring together approximately 30 international

participants, including pediatric rheumatologists, representatives of pediatric rheumatology organizations, clinical trial networks and registries, a data scientist, and a patient representative. The purpose of the meeting is to reach an international, consensus-based and data-informed conceptual definition of disease flare in non-systemic JIA.

Despite advances in treatment, many children and adolescents with JIA experience disease flares. However, there is currently no internationally agreed, validated definition of flare in non-systemic JIA. A standardized definition could improve clinical practice, facilitate consistent outcome assessment in observational studies and clinical trials, and support more comparable research internationally.

We invite Johnson & Johnson Innovative Medicine to participate at the Gold sponsorship level. The requested support is €50,000 for the Gold Tier. However, support at the Silver Tier, at €25,000, would also be greatly appreciated.

Requested Opportunity and Benefits

Opportunity	Amount	Included Benefits
Gold Tier	€50,000	Appropriate acknowledgement as a meeting supporter in meeting materials, webpage and on meeting signage, subject to applicable institutional and meeting requirements; inclusion of sponsor name/logo in the meeting programme or participant materials, where permitted; opportunity to provide an informational stand or materials at the meeting, subject to venue, institutional, and compliance requirements; and acknowledgement in resulting publications where appropriate and consistent with journal and publication policies.
Silver Tier	€25,000	Appropriate acknowledgement as a meeting supporter in meeting materials, webpage and on meeting signage, subject to applicable institutional and

		meeting requirements; inclusion of sponsor name/logo in the meeting programme or participant materials, where permitted; and acknowledgement in resulting publications where appropriate and consistent with journal and publication policies.

All support will be acknowledged transparently and in accordance with applicable institutional, meeting, and publication requirements. Sponsorship will not influence the scientific content, conduct, analysis, conclusions, participant selection, or independence of the project or consensus process.

The agenda and further information on the project are available upon request. Please contact Veronika Rypdal, Principal Investigator, at veronika.rypdal@unn.no or veronikagj@gmail.com or phone number 004792466162.

Sincerely,

Veronika Rypdal, MD, PhD
